

WE WORK BEST UNDER PRESSURE

MURTECH BEARING PADS

SAFETY. DEPENDABILITY. LONGEVITY.

We provide all of your AASHTO Bearing Pad requirements with qualifying materials for all 50 states and Canada. We manufacture and test bearing pads for bridges, industrial machinery, heavy equipment, buildings and other applications. If it requires compensation for vibrations, horizontal movements, loads, and rotations—we make nearly any shape or size product you need.

MURTECH BEARING PADS are offered in sheets of various sizes to be field cut, die cut pads, strips, and any thickness specified either as a lamination or a solid.

We have standard size steel laminated as well as custom sizes. We also provide reinforced EPDM, Neoprene and other rubber compound gutter systems, joint sealants and chemical bonding agents for your complete roadway project.
